## OPTIONS

### HEATED AIR AND AROMA-THERAPY

Warm bubbles powered by our dual-speed heated blower carry the body with soothing fragrances you can choose.

### LED AMBIANCE LIGHT PACKAGE

Digital Light System offers a generous number of extremely energy efficient digital lights that change to 8 colours in 9 display settings to enhance the mood. Lights are designed to operate flawlessly for 100,000 hours.

### QUAD SPEAKER SOUND SYSTEM

All Paragon Elite models come standard with our Quad Speaker Sound System. Includes twin waterproof pop-up speakers and twin exterior speakers. This system allows you to listen while soaking and/or relaxing outside the spa.

- AM/FM/CD stereo system
- 2 - Pop-up lip mounted waterproof speakers
- 2 - Exterior marine grade speakers built into the cabinet
- Remote topside control
- Photo-cell controlled digital perimeter lighting

### ELITE OPTION PACKAGE

The Elite Option Package combines the LED Ambiance Light Package(above) with a Quad Speaker Sound System.

PARAGON

Without compromise

The question we hear  
more than any other is

"What makes Paragon different from other spas and hot tubs"?

The answer can be summed up in two words . . .

## WITHOUT COMPROMISE

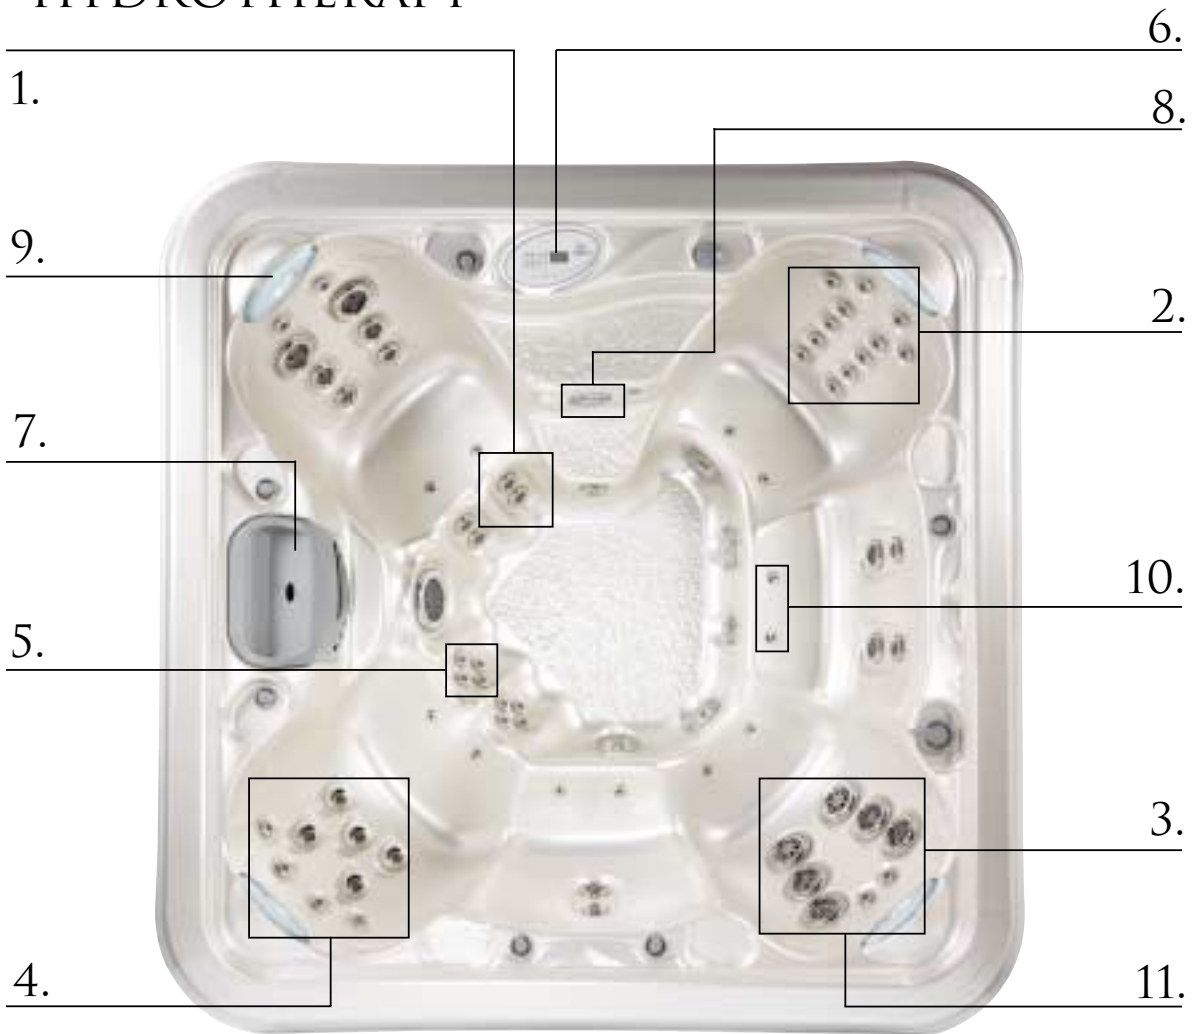

Paragon is about pushing the envelope and bringing together the absolute best of what our industry has to offer and combining it with leading edge technologies from other industries to produce a spa that is without equal in terms of reliability, quality, energy efficiency, comfort, hydrotherapy and environmental friendliness.

Each Paragon Spa is subjected to 12 hours of the most rigorous operating parameters and hundreds of quality and reliability tests are performed to maximize the assurance of trouble-free operation. All Paragon Spas are built on the Permaloc Structural Support System guaranteeing exceptional energy efficiency, structural support and protection for your spa and its equipment, year after year.

When you own a Paragon – you own the best.

# HYDROTHERAPY

1. **Trigger Point Therapy:** Specially designed adjustable rotating nozzles providing a soothing massage for your feet and hands
2. **Spinal Touch Therapy:** Massages around shoulders, upper back and spine area to relieve daily stresses
3. **Sport Massage:** Provides a combination of deep connective tissue massage to shoulders and middle back
4. **Effleurage:** Nozzles uniquely angled to give you a soft stroking upward massage to your back and shoulders

5. **Multi-Jet Calf Therapy:** Soothes and massages calf muscles
6. **Power Touch Control**
7. **Everflo Filtration System**
8. **Sunglo Light Package**
9. **Easy-Rest Head Cushions**
10. **Champagne Air System with Aromatherapy** (option on all models): Warm bubbles or aromatic air caress the body
11. **Touch of Elegance Chrome Package:** Stainless steel trim option on 250 models

# PARAGON STORY

Like a well built home or high performance car – it is often the things you do not see that make the difference between just functional and sustained, exceptional performance. Paragon Spas were designed from the ground up without tolerance for shortcuts – starting with what you do not see – **The Permaloc Structural Support System.**

**The Permaloc Structural Support System** is made up of several parts each one an integral component to the most advanced structural spa support system available. Proper structural support and protection is essential to the long term performance and reliability of your spa. Only Paragon has it.

## Permaloc RotNot Base™

- Environmentally friendly – made from 100% recycled composite materials leaving a healthy legacy to future generations
- Injection moulded – strong and stable – heavy duty – many times stronger and longer lasting than other spa base processes and materials
- Will not rot, warp or rust
- Impervious to insects and rodents, including termites and mice
- Will look good for years and years
- No maintenance
- Built-in venting for proper air circulation

## Permaloc Vertical Support™

- Environmentally friendly – made from 100% recycled composite materials leaving a healthy legacy to future generations
- Strong shell support that absorbs and distributes shell stresses
- Will not rot, warp, rust or degrade over time.
- Creates perfect alignment of Paragon Spa Shell to Permaloc RotNot Base
- Results in a spa of superior strength, reliability, safety and performance

## PermaLoc Lip Support™

- Ties the spa shell precisely and consistently to the base
- Double plastic over plastic design results in superior lip strength
- Will not warp, rust or degrade over time
- Creates the "Overhang" lip design which results in the perfect edgeless transition and receptor for the PermaLoc Eternal-Wood Cabinet

## Permaloc True-Blue Double Up Insulation™

- Double-up, layered insulation system provides superior insulation for maximum energy efficiency and excellent noise reduction
- Extreme energy efficiency and a cocooned environment for your Paragon Spa Equipment ensure low operating costs and long lasting reliable operation.

## PermaLoc Eternal-Wood Cabinet™

- The final component of The Permaloc Structural Support System
- Beautiful synthetic wood cabinet that requires no maintenance and retains its good looks
- Locks into a specially designed retainer slot in the Permaloc RotNot Base and attaches under the "Overhang" of the Permaloc Shell, for perfect fit and finish.
- Creates an added layer of protection for your Paragon Spa Equipment

## Permaloc Spa Shell™

- Made from Lucite Extra, absolutely the best quality sanitary grade, high density, cross-link acrylic available, factory laminated to virgin ABS for long lasting finish and colour retention.
- Permanently impregnated with Microban™ anti-microbial
- Backed with Permaloc Acrylobond styrene-free reinforcing for superior strength and adhesion

The Permaloc Structural Support System is only available on Paragon Spas and a reflection of our commitment to "only the best will do".

| 7 <b>Ozone/Circulation Jet</b>      |  |

Even though we have experience around the world, our roots are Canadian. We know about cold weather! While you are submerged in warm soothing water, cradled in one of our famously deep comfortable contoured seats, do not worry about the cost – the combination of our True Blue Double-up Insulation and LEC Energy Management System will minimize energy consumption and operating costs.

## MINI-MIZER CIRCULATION

All Paragon Spas use ultra energy efficient 24/7, high-flow circulation pumps which are proven to be far more energy efficient than conventional two-speed pumps

- 1/15hp 48frame motor that draws only .63 amps, costing less than a 100 watt light bulb to operate.
- A conventional 2-speed pump, running on low speed for only 10 hours per day and turned off the rest of the time, costs 67% more!
- All our pumps are rubber mounted for quiet operation
- Hi-efficiency, long lasting Teflon Coated Titanium heater

## SET & FORGET CONTROLS

All Paragon Spas incorporate advanced control technology that constantly monitor water flow, pressure and temperature to ensure the most energy efficient, safe and healthy environment for your family.

- Maintenance functions operate automatically to turn on and off when needed to maximize safety and sanitation and minimize costs.
- Operational functions for controlling pumps, lights, etc., are timed so you turn them on and they turn off automatically

## FILTRATION & CIRCULATION

We know you want your family's spa water to be pristinely clean. That is why we built the best filtration/circulation system into every Paragon Spa, with:

- 2 – 4.65m high capacity filter cartridges. One dedicated to the 24/7 Mini-Mizer Circulation Pump and the second dedicated to the jet pumps to double filtration when spa in use or flushing.
- 24/7 circulation via an 80LPM Mini-Mizer pump ensures every molecule of water is filtered many times per day.
- Managed Ozone Generators are standard. Ozone is one of the most effective disinfectants available. Turns off automatically when you operate the jets, lights or blower for maximum safety.
- System self-flushes for maximum water quality
